

# CYBERSECURITY

## What was WannaCry

and why it's important to you

### PRESENTED BY

JC van der Walt  
Partner at Jackson McDonald

Carolyn Moss  
Senior Associate at Jackson McDonald

Cyber breaches (and the associated costs) are on the rise. With mandatory breach notification less than 7 months away and ASIC declaring cybersecurity to be one of its top priorities, the onus is on businesses to get cybersecurity sorted out. The consequences of failure range from the costly shut down of a business, to expensive law suits and significant fines, so it's best to be ahead of the game.

For architects in particular, it's not just managing your own business - the rise of "Smart" cities and buildings means that it's essential to have an understanding of the risks to properly design for your clients.

**TO REGISTER ONLINE GO TO:**  
[ARCHITECTURE.COM.AU/EREGISTER?ID=5590](http://ARCHITECTURE.COM.AU/EREGISTER?ID=5590)

**DATE:** MONDAY 7 August 2017

**TIME:** 5.00pm Registration  
5.30pm Start

**VENUE:** WA Chapter Office  
33 Broadway, Nedlands

### LEARNING OUTCOMES

- what cybercrime is, including the different types of malware and how it's spread (using Wannacry and Petya as the framework for discussion);
- who cybercriminals are and who they are targeting;
- the costs to business of a successful cyberattack;
- the current legal obligations of businesses/ companies (and officers of companies) in relation to cyberrisk;
- the upcoming Mandatory Breach Notification law (from February 2018);
- some tips for businesses and their staff for increasing a business's cyber resilience;
- the consequences for a business of a successful cyberbreach; and
- within the above, specific issues for architects to consider
