

THE FUTURE OF WOOD

INTERNATIONAL SPEAKER

Daniel Gudsell

Founder, Abodo Wood Ltd
Winner, Green Ribbon Award New Zealand
Winner, Sustainable Business Award, New Zealand

Daniel will discuss different types of timber modification and the sustainable use of certified plantation timbers that make up those products.

He will also cover thermally modified timber, the processes involved, technical benefits of the product and the reasons why he believes it will be a more stable and durable choice of timber in the future.

DATE: Wednesday 30 May 2018
TIME: 5.00pm refreshments for 5.30pm start
VENUE: The Institute - 33 Broadway, Nedlands
COST: Members FREE
Non Members \$55.00

LEARNING OUTCOMES:

- Understand why wood modification is an increasingly popular technology
- Understand the advantages of different wood modification types
- Understand the most prevalent wood modification: thermal modification
